CAREER OBJECTIVE

Motivated IT support and cybersecurity professional with hands-on experience in troubleshooting, Windows systems, Active Directory, networking, and security labs. Seeking an IT Support, Helpdesk Analyst, Service Desk Analyst, or junior cybersecurity role where I can apply my technical skills and continue growing professionally.

TECHNICAL SKILLS

IT Support & Administration:	Windows 10/11 support, Windows Server basics, Active Directory user and group management, Group Policy, NTFS permissions, DHCP, DNS, print server support, troubleshooting documentation
Networking:	TCP/IP, subnetting, VLANs, IP addressing, routing basics, firewall rules, wireless access points, VPN concepts
Cybersecurity Tools & Labs:	TryHackMe labs, Kali Linux practice, vulnerability scanning, packet analysis, basic penetration testing, firewall/IDS lab configuration
Cloud & Identity:	Microsoft Azure basics, Microsoft Entra ID, MFA setup, user and group management
Endpoint & Support Tools:	SCCM, Microsoft Intune, Freshservice, TeamViewer, Quick Assist, Remote Desktop Connection
Development & Database:	Python, HTML, CSS, JavaScript, MySQL, Git, GitHub
Virtualization:	VirtualBox, VMware, Windows/Linux virtual lab environments

WORK EXPERIENCE

IT Intern – MM College

Melbourne, VIC | September 2025 – Present

- Support attendance system digitalization through database design, login authentication, testing, troubleshooting, and documentation.
- Assist with identifying system issues, improving usability, and supporting secure data handling.

Freelance IT Support / Student Projects

2024 – Present

- Assisted with computer setup, troubleshooting, software installation, malware removal, and Windows/Linux configuration.
- Practiced IT support, networking, and cybersecurity concepts through virtual labs and student projects.

ACADEMIC PROJECTS & LAB EXPERIENCE

Windows Server & Active Directory Lab

- Practiced Active Directory user and group management, Group Policy, NTFS permissions, shared folder access, DHCP, DNS, and basic print server concepts.
- Troubleshoot login, permission, network connectivity, and shared resource access issues in a virtual lab environment.

IT Support & Troubleshooting Practice

- Practiced Windows/Linux system setup, software installation, remote support, basic malware removal, account support concepts, and issue documentation.
- Applied structured troubleshooting steps to identify problems, test solutions, and communicate technical issues clearly.

Network & Security Lab Practice

- Built virtual labs using pfSense, Snort, Kali Linux, and virtual machines to understand firewall rules, traffic monitoring, IDS alerts, packet analysis, and basic vulnerability assessment.

EDUCATION

Bachelor of Information Technology (Cyber Security)

Victorian Institute of Technology, Melbourne, VIC | Expected Graduation: 2026

- Focus areas: Cybersecurity, Networking, Digital Forensics, and System Administration
- Achievement: Dean's Honours List

CERTIFICATIONS & TRAINING

- ISC2 Certified in Cybersecurity (CC)
- Introduction to SQL – Institute of Applied Technology
- Git and GitHub Certification
- CompTIA A+ – In Progress
